
BUILDING EVOLUTION CORPORATION

Achieve Performance & Durability Through A Holistic Approach™

Title: Associate
Category: Building Performance Analyst
Job Type: Full Time, salaried (exempt)
Minimum Experience: 3-5 years related experience
Required Education: Bachelor's Degree
Reply to: Info@BuildingEvo.com

Job Description:

BEC is looking for a fun, hardworking, self-directed, and aspiring individual with a passion for building science to join our team and be a part of its growth. The Associate is an “all around” player on our team and will exhibit solid communication skills, technical skills, and self-management. The Building Performance Analyst performs essential technical services for our clients and contributes to the productive operation of the company.

Responsibilities Include:

- Conduct client communications to the highest professional standards.
- Energy Modelling and data analysis.
- On-site assessments, inspections and investigations involving observation and diagnostic testing.
- Participate in project meetings.
- Manage tasks to budget.
- Design Review.
- Verify design and construction compliance with performance standards.

Minimum Requirements, Skills and Qualities:

- BS in Mechanical or Architectural Engineering or Construction-related field.
- Technical knowledge of HVAC and building enclosure systems.
- Technical proficiency in energy modeling (WUFI Passive and/or eQUEST) and data analysis.
- Ability to work in the Worcester office, with travel expected part of the time.
- The selected candidate must be authorized to work in the United States.
- Must have access to reliable transportation and clean driving record.

Location

- Work to be performed primarily within the Worcester office.
- Travel to client sites within Massachusetts 1-2 days/week plus occasional out of state travel expected.
