
BUILDING EVOLUTION CORPORATION

Achieve Performance & Durability Through A Holistic Approach™

Title: Mechanical Engineer, Senior Associate
Category: Building Performance and Applied Building Science
Job Type: Full Time, salaried (exempt)
Minimum Experience: 8+ years related experience
Required Education: Bachelor's or Master's Degree
Reply to: Info@BuildingEvo.com

Job Description:

BEC is looking for a fun, hardworking, self-directed, and aspiring individual with a passion for building performance to join our team and be a part of its growth. The candidate must be capable of making immediate contributions to client projects and company initiatives. The Senior Associate is an “all around” leader on our team and will exhibit strong communication skills, technical skills, self-management, client relationship management, and project management.

Responsibilities Include:

- Conduct client communications to the highest professional standards.
- Provide advanced technical services for commissioning/building performance projects.
- Manage tasks and projects to budget.
- Manage and mentor other team members.
- Business development including, but not limited to, proposal development and delivery.
- Design Review.
- Energy Modelling and data analysis.
- On-site assessments and investigations involving visual observation and diagnostic testing.

Minimum Requirements, Skills and Qualities:

- BS or MS in Mechanical Engineering.
- Advanced technical knowledge of HVAC and building enclosure systems.
- Technical proficiency in energy modeling and data analysis.
- Ability to work in the Worcester office, with travel expected part of the time.
- The selected candidate must be authorized to work in the United States.
- Must have access to reliable transportation and clean driving record.

Location

- Work to be performed primarily within the Worcester office (3-4 days/week, pandemic pending).
- Travel to client sites within Massachusetts 1-2 days/week plus occasional out of state travel expected.

BUILDING EVOLUTION CORPORATION

Achieve Performance & Durability Through A Holistic Approach™

Mechanical Engineer, Senior Associate

Architectural Engineer, Senior Associate

Building Scientist, Senior Associate

Do you have a passion for building performance? Do you crave an environment where your hard-earned experience is valued and exercised daily? Do you seek a dynamic career with the opportunity for growth and impact? Do you aspire to join a growing business committed to being a great team? Do you dream about professional work life that prizes both hard work and flexibility?

If so, then we need to talk. Building Evolution Corporation (BEC) has immediate openings for qualified professionals to join our team.

BEC is a market leader in the high-performance built environment. We bring deep expertise and experience in building enclosures and mechanical systems to solve complex building performance problems and to navigate our client's projects toward ambitious building performance goals.

BEC provides comprehensive building performance consulting from conceptual design, through construction and commissioning services, and throughout building lifespan operations. We give our clients the knowledge to make informed decisions and achieve high performance buildings.

The demand for our services in Passive House construction and high performance retrofit continues to grow. In addition to being propelled by the increase in appreciation for high performance buildings, BEC is also riding the wave of the Worcester renaissance. BEC's headquarters are in the revitalized section of Kelley Square in a restored 19th century factory building housing an eclectic mix of cafes, shops, and businesses directly adjacent to the new Worcester Public Market and steps from the new Polar Park. Locating in Worcester has confirmed our commitment to participating in the local economy while serving clients across the nation. We also enjoy the benefits of living in Central Massachusetts and generally avoiding a Boston/Cambridge commute. It allows us to work to live, not the other way around.

BEC offers competitive salary commensurate with experience and generous PTO. Benefits include top-notch health insurance plan (75% employer contribution), dental and vision plan (100% employer-paid), short-term and long-term disability insurance (100% employer-paid), retirement savings plan with employer match, monthly phone allowance, professional development opportunities.
